EXPERIENCE

Gway Tech Solutions Private Limited , Chennai

Backend Developer intern Nov 2023 - Feb 2024

Technologies : Django & Rest Framework , ORM , Python , MySQL

Implemented jwt token based authentication and authorization (access control) mechanisms, ensuring secure access to resources.

Integrated backends of two applications and allowed to securely fetch and update one application's data from another application using api token.

Utilized the raw SQL(correlated subquery) along with django ORM to reduce the time needed to query data (before : 3-4s , after : less than 1s)

EDUCATION

Thiruvalluvar University , Vellore - *B.Sc. Computer Science*

8.58 CGPA 2020 - 2023

Sri Jayeandra Saraswathi Vidyalaya School , Villupuram - *HSC*

85.6% 2019 - 2020

Government Higher Secondary School , Veerapandi - *SSLC*

92% 2017 - 2018

PROJECTS

Event Registration Management - Full Stack

Technologies : Django , React , MongoDB , Python , JavaScript - [view](#)

Features : Authentication , Pagination , Notifications , Export

Responsive Image Cropper using Canvas - Front end

Technologies : JavaScript , HTML , and CSS - [view](#)

Features : Advanced event tracking , Closure for encapsulation

Advertising Website - Full Stack

Technologies : PHP , MySQL , Javascript , HTML , CSS - [view](#)

Features : Image optimization, AJAX for asynchronous requests

SKILLS

HTML & CSS , Javascript , React ,
Django & Rest Framework ,
Python , C & C++ , PHP , MySQL ,
Basic DSA , Git & GitHub

AWARDS

Full-Stack Python Training

in HOPE Foundation under
Accenture project

Python Training in Besant
Technologies.

SUMMARY

Yeah , I'm a fresher. But I have worked in some standalone projects one of which a image cropper which may seem simple but behind the screens it possess some complex logics like drawing the cropper based on the position of the mouse using event tracking. I am explaining this so as to manifest that I am able to do code. Also I am willing to learn more and more in this domain.

Thank You
